EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Mr. William G. Gensler, Inventor on 12/15/04.

3. Claims filed 9/20/03 are amended as follows:

1. A method for measuring the water content within a plant comprising the steps of:

placing a sensor ~~surface~~ electrode in any gravitation orientation implanted within said plant,

placing a second electrode in ~~the~~ a root environment,

measuring the area of said sensor ~~surface~~ electrode implanted within said plant,

measuring the electrical capacitance between a first wire connected to said sensor ~~surface~~ electrode and a second wire connected to said second electrode in said root environment,

forming ~~the~~ a ratio of said electrical capacitance to said area of said electrode surface for determining water content.

Art Unit: 2858

2. Apparatus for measuring the water content within a plant comprising:

sensor ~~surface~~ electrode means for ~~making contact~~ implanting within said plant,
second electrode ~~means~~ for making contact with the a root environment,
first wire ~~means~~ connected to said sensor ~~surface~~ electrode, second wire ~~means~~ connected
to said second electrode ~~means~~,
means coupled to said first wire ~~means~~ and said second wire ~~means~~ for measuring the
electrical capacitance generated therebetween by said plant τ ,
area means for measuring area of said sensor ~~surface~~ electrode implanted within said
plant τ ,
means for determining water content by forming a ratio of said electrical capacitance to
said area of said electrode surface.

3. Apparatus as recited in claim 2 further including a plurality of sensor ~~surface~~ electrode means
and means interposed between each of said sensor ~~surface~~ electrodes and said measuring
means for selectively connecting each one of the said sensor ~~surface~~ electrodes to said
measuring means.

Allowable Subject Matter

4. Claims 1-3 are allowed.

The prior art of record fails to teach in combination as claimed a system for measuring water
content within a plant including a sensor electrode for implanting within the plant. A second
